

ER-3-1214

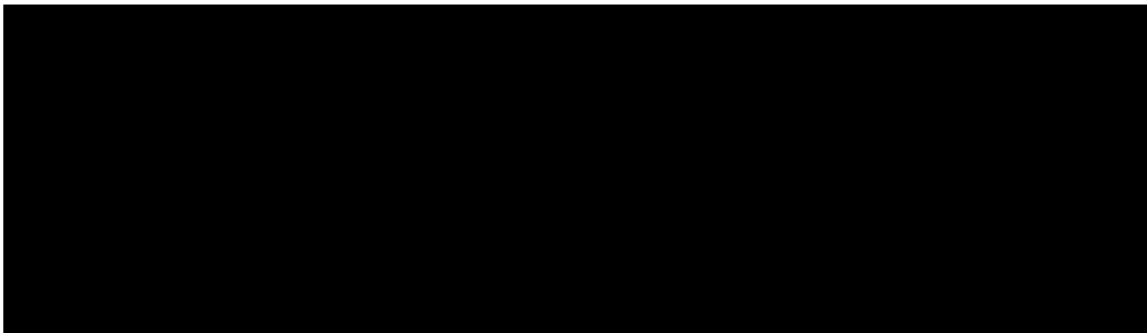

23 July 1952

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT: Approval of Consultant

1. With the growth of research work done by the Agency through outside firms, we expect a great increase in the future in the number and complexity of patent problems. This is a highly specialized field in which the general practitioner is seldom well-versed. We believe it would be highly desirable to have an experienced patent attorney of high reputation available as a consultant.

25X1A

3. I recommend retention of [redacted] as a consultant if he is willing to advise us in that capacity.
